Zaheen Telecom SRL, a company registered in Romania, confirms that since the year 2018 it has been using **Statlook** and would like to express its satisfaction both with the quality and functionality of the software itself, as well as with the cooperation with **media-press.tv S.A.**, including the level of technical support provided by it.

Statlook system is not only an invaluable help in solving problems encountered by the network administrators in their daily work. The system also provides specific support in making more strategic decisions regarding the expansion, modernization or more efficient use of individual IT resources.

The implementation of software has also directly translated into a significant improvement in the efficiency of employees and the elimination of certain undesirable behaviors. Implementation of **Statlook** system translated directly into the quality of our work - from now on we work more calmly and efficiently.
